Part 1. Symposium J on Correlated Effects in Atomic and Cluster Ion Bombardment and Implantation

Section I. Fundamental Aspects of Cluster Collisions

Molecule and cluster bombardment: energy loss, trajectories, and collision cascades
P. Sigmund *, I.S. Bitensky and J. Jensen 1
Nonlinear transmission sputtering
I.S. Bitensky and P. Sigmund 12
Molecular dynamics study of shock wave generation by cluster impact on solid targets
Z. Insepov and I. Yamada 16
Track formation in metals by electronic processes using atomic and cluster ions
A. Dunlop *, H. Dammak and D. Lesueur 23
Atomic and cluster ion bombardment in the electronic stopping power regime: A thermal spike description
M. Toulemonde, Ch. Dufour, Z. Wang and E. Paumier 26

Section II. Production, Acceleration and Diagnostics of High Intensity Beams and of Molecular Ions a

Production, acceleration and diagnostics of high intensity beams
B.H. Wolf * 30
Production, acceleration and diagnostics of molecular ions and ionized clusters
P. Håkansson *, S. Della-Negra, J.P. Mouffron, B. Waast and P.A. Sullivan 39

Section III. Surface Phenomena, Photon, Electron or Ion Emission, Sputtering

Hyperthermal chemistry and cluster collisions
E.E.B. Campbell * and I.V. Hertel 48
A plasma desorption mass spectrometry study of cluster ion formation from group IIA nitrates
W.R. Ferrell, M.J. Van Stipdonk and E.A. Schweikert 55
Sputtering of large size clusters from solids bombarded by high energy cluster ions and fullerenes
K. Baudin, A. Brunelle, S. Della-Negra *, D. Jacquet, P. Håkansson, Y. Le Beyec, M. Pautrat, R.R. Pinho and Ch. Schoppmann 59
Acceleration of clusters, collision induced charge exchange at MeV energies and applications for materials science
F. Ames, M. Döbeli, C.R. Musil, P.W. Nebiker, L. Scandella, M. Suter and H.A. Synal 64
The use of coincidence counting mass spectrometry to study the emission and metastable dissociation of cluster ions
M.J. Van Stipdonk and E.A. Schweikert 68
Secondary electron emission of solids by impact of molecular ions and clusters
M. Fallavier * 72

0168-583X/96/$15.00 © 1996 Elsevier Science B.V. All rights reserved

Secondary electron emission from thin carbon foils under hydrogen cluster impact
A. Billebaud, D. Dauvergne, M. Fallavier, R. Kirsch, J.-C. Poizat, J. Remillieux, H. Rothard and J.-P. Thomas 79

Part 2. Joint Session, Symposia J and C

Section IV. Cluster Projectiles in Materials Processing

SiO_2 film formation at room temperature by gas cluster ion beam oxidation
M. Akizuki +, J. Matsuo, I. Yamada, M. Harada, S. Ogasawara and A. Doi 83
Reactive accelerated cluster erosion (RACE) by ionized cluster beams
J. Gspann 86
Investigation of damage formation by gas cluster ion bombardment
J. Matsuo *, D. Takeuchi, A. Kitai and I. Yamada 89
Preparation of C60 single crystalline thin film by ionized cluster beam deposition and ion implantation into single crystalline C60 thin film
S. Isoda *, H. Kawakubo, S. Nishikawa and O. Wada 94
The computer simulation of energetic particle–solid interactions
R.P. Webb *, R. Smith, I. Chakarov and K. Beardmore 99
STM investigation of energetic carbon cluster ion penetration depth into HOPG
G. Bräuchle, S. Richard-Schneider, D. Illig, R.D. Beck, H. Schreiber and M.M. Kappes 105
Atomistic study of defect generation mechanisms in Mo/W superlattices
M.H. Carlberg, V. Chirita and E.P. Münger 109

Section V. Insulating Materials

Defect creation induced by GeV ions in MgO containing Na precipitates
M. Beranger +, R. Brenier, B. Canut, S.M.M. Ramos, P. Thevenard, E. Balanzat and M. Toulemonde. 112
N^+ ion implantation effects on microhardness and adhesion in TiO_2 films
K. Fukushima and I. Yamada 116
Conducting polymer synthesis via ion beam induced precursor conversion
J. Davenas, V. Massardier and V.H. Tran 120
Processing and characterization of ferroelectric thin films by multi-ion-beam sputtering
I. Kanno, S. Hayashi, R. Takayama, H. Sakakima and T. Hirao 125

Part 3. Symposium C on Pushing the Limits of Ion Beam Processing – From Engineering to Atomic Scale Issues

Section VI. Silicon – Defects and Damage

TED of boron in the presence of EOR defects: the use of the theory of Ostwald ripening to calculate Si-interstitial supersaturation in the vicinity of extrinsic defects
C. Bonafos, D. Alquier, A. Martinez, D. Mathiot and A. Claverie 129
Observation of vacancy clustering in FZ-Si crystals during in situ electron irradiation in a high voltage electron microscope
L. Fedina, J. Van Landuyt, J. Vanhellemont and A.L. Aseev 133
The damage recovery and electrical activation of shallow boron implants in silicon: The effects of high energy implants
K. Kyllesbech Larsen, V. Privitera, S. Coffa, F. Priolo, C. Spinella, M. Saggio and S.U. Campisano. . 139
The effect of dose rate on ion implanted impurity profiles in silicon
S. Tian, S.-H. Yang, S. Morris, K. Parab, A.F. Tasch, D. Kamenitsa, R. Reece, B. Freer, R.B. Simonton, C. Magee. 144

Damage profiles in as-implanted silicon: fluence dependence
R. Nipoti, G. Lulli, S. Milita, M. Servidori, C. Cellini and A. Carnera 148

Dynamic Monte Carlo simulation of nonlinear damage growth during ion implantation of crystalline silicon
E. Albertazzi, M. Bianconi, G. Lulli, R. Nipoti, A. Carnera and C. Cellini 152

Molecular dynamics study of the fluence dependence of Si sputtering by 1 keV Ar^+ ions
J.E. Rubio, L.A. Marqués, L. Pelaz, M. Jaraíz and J. Barbolla 156

Spectroscopic ellipsometry applied to the determination of an ion implantation depth profile
P. Boher, J.L. Stehle, J.P. Piel, M. Fried, T. Lohner, O. Polgar, N.Q. Khanh and I. Barsony 160

Kinetics of impurity gettering on buried defects created by MeV argon implantation
A. Grob, P. Rohr, G. Mariani, J. Sevely and J.J. Grob 169

Influence of sample thickness on carrier lifetime modification induced by 4 MeV proton implantation in silicon
L.P. Biró, J. Gyulai, N.Q. Khanh and P. Tüttő 173

Section VII. Silicon – Processing Issues

Ultra-shallow junction formation in silicon using ion implantation
A.F. Tasch and S.K. Banerjee * 177

The chemical factor and its influence on the formation of defect structures and their gettering properties in layers of silicon implanted with chemical-active ions
A.N. Aleshin, K.L. Enisherlova, A.A. Kalinin and V.N. Mordkovich 184

Implanted buried layers and interfaces: Application in the new area of very- and ultra-high efficiency solar cells
Z.T. Kuznicki, J.-J. Grob and B. Prévot 188

Ion implanted silicides studies by frequency noise level measurements
M. Stojanovic, A. Vasic and C. Jeynes 192

The effect of rapid thermal treatments on the formation of shallow junctions by implanting boron and BF_2^+ ions into (100) silicon through a protecting mask
L. Kaabi, B. Remaki, C. Gontrand, P.F. Lo and B. Balland 196

Submicron $CoSi_2$ structures fabricated by focused ion beam implantation and local flash lamp melting
L. Bischoff, K.-H. Heinig, J. Teichert and W. Skorupa 201

Section VIII. Oxygen / Silicon System

Structural defects in SIMOX
J. Stoemenos * 206

Novel approach for synthesizing of nanometer-sized Si crystals in SiO_2 by ion implantation and their optical characterization
T. Shimizu-Iwayama, Y. Terao, A. Kamiya, M. Takeda, S. Nakao and K. Saitoh 214

Effect of the gas ambient on the intensity of the visible photoluminescence from Si microcrystallites in a SiO_2 matrix formed by ion implantation
T. Komoda, J.P. Kelly, R.M. Gwilliam, P.L.F. Hemment and B.J. Sealy 219

Self-structuring of buried SiO_2 precipitate layers during IBS: A computer simulation
S. Reiss + and K.-H. Heinig 223

Improved characterization of fully-depleted SOI wafers by pseudo-MOS transistor
A.M. Ionescu, S. Cristoloveanu, S.R. Wilson, A. Rusu, A. Chovet and H. Seghir 228

Section IX. Engineering and Materials Processing

Progress in Japanese frontier projects on ion beam processing of advanced materials
K. Hattori * 233

Characteristics and peculiarities of surface processing by gas cluster ion beams
I. Yamada * 242

Atomic level smoothing of CVD diamond films by gas cluster ion beam etching
A. Yoshida, M. Deguchi, M. Kitabatake, T. Hirao, J. Matsuo, N. Toyoda and I. Yamada 248
Design considerations for plasma immersion ion implantation systems
S. Mändl, J. Brutscher, R. Günzel and W. Möller 252
Lateral implantation dose measurements of plasma immersion ion implanted non-planar samples
J. Hartmann, W. Ensinger, R.W. Thomae, H. Bender, A. Königer, B. Stritzker and B. Rauschenbach . 255
Ion beam analysis of plasma immersion implanted silicon for solar cell fabrication
N.Q. Khánh, I. Pintér, Cs. Dücső, M. Ádám, E. Szilágyi, I. Bársony, M.A. El-Sherbiny and J. Gyulai . 259
Characterization of hydrogenated amorphous silicon prepared by ion beam assisted evaporation
N. Hadj Zoubir, H. Rinnert, M. Vergnat, G. Marchal and A. Burneau 263
Beam scanning system for the uniformity of implanted doses in a large area
P. Desgardin, E. Ntsoenzok, J.F. Barbot, J. Briaud, J. Vernois and D.B. Isabelle 267
Atomic scale investigation of surface modification induced by 215 MeV Ne irradiation on graphite
L.P. Biró, J. Gyulai and K. Havancsák 270
Thin BN films obtained by dual-ion-beam sputtering: an FT-IR and . spectroscopic ellipsometry characterization
C. Quirós, P. Prieto, J.F. Trigo, E. Elizalde and J.M. Sanz 275
Preparation of Al_2O_3 films by a new CVD process combining plasma and accelerated ion beams
H. Nakai, H. Kuwahara, J. Shinohara, T. Kawaratani, T. Sassa and Y. Ikegami 280
Layer and interface analysis of ultra thin ion beam produced silicon nitride layers by NRA and TEM
A. Markwitz, S. Klein, R.W. Michelmann, H. Baumann, E.F. Krimmel and K. Bethge 284
Structural, morphological, electrical and luminous properties of undoped micro/nanocrystalline silicon films deposited by ion-assisted beam deposition techniques
H.R. Khan, H. Frey and F. Banhart 289
Effects of ion irradiations on properties of polyphosphazene–silica composite films
J.C. Pivin, G. Brusatin, M. Guglielmi, G. Facchin and M. Gleria 294
He implant-damage isolation of MOVPE grown GaAs/InGaP/InGaAsP layers
H. Strusny, P. Ressel, K. Vogel and J. Würfl 298

Section X. Group IV Semiconductors

Ion implantation induced damage in relaxed Si0.75Ge0.25
F. Priolo, C. Spinella, E. Albertazzi, M. Bianconi, G. Lulli, R. Nipoti, J.K.N. Lindner, A. Mesli, R.C. Barklie, L. Sealy, B. Holm and A.N. Larsen 301
A study of base contact formation in epitaxial $Si/Si_{0.88}Ge_{0.12}$ HBT structures
A. Nejim, F. Cristiano, P.L.F. Hemment, D.A.O. Hope, J.L. Glasper, C. Pickering, W.Y. Leong and D.J. Robbins 305
Structural studies of ion beam synthesised SiGe/Si heterostructures for HBT applications
F. Cristiano, A. Nejim, D.A.O. Hope, M.R. Houlton and P.L.F. Hemment 311
Radiation damage of 2 MeV Si ions in $Si_{0.75}Ge_{0.25}$: optical measurements and damage modelling
J.K.N. Lindner 316
Investigation of the damage induced by 200 keV Ge^+ ion implantation in 6H–SiC
Y. Pacaud, W. Skorupa, A. Perez-Rodriguez, G. Brauer, J. Stoemenos and R.C. Barklie 321
Ion beam synthesis of β-SiC at 950°C and structural characterization
N. Frangis, A. Nejim, P.L.F. Hemment, J. Stoemenos and J. Van Landuyt 325
XTEM and IR absorption analysis of silicon carbide prepared by high temperature carbon implantation in silicon
L. Simon, J. Fauré, A. Mesli, T. Heiser, J.J. Grob and J.L. Balladore 330
Ion beam assisted recrystallization of SiC/Si structures
A. Pérez-Rodríguez, R. Kögler, L. Calvo-Barrio, C. Serre, A. Romano-Rodríguez, V. Heera, W. Skorupa and J.R. Morante 334

Ion beam synthesis by tungsten-implantation into 6H–silicon carbide
H. Weishart, H.J. Steffen, W. Matz, M. Voelskow and W. Skorupa 338
Modification of magnetron sputtered a-$Si_{1-x}C_x$:H films by implantation of Ge^+
N. Tzenov, D. Dimova-Malinovska, Ts. Marinova, V. Krastev and T. Tsvetkova 342
